

A-LEVEL COURSE GUIDE

**EzyMaths covers both AS and A-level
and provides full content coverage.**

OUR MODEL

WHEN CREATING EZYMATHS, WE WANTED EVERY VIDEO AND ASSESSMENT TO ADHERE TO 4 KEY PRINCIPLES:

POTENTIAL USES

EzyMaths is designed to put teachers in charge and be used to support a wide variety of approaches. Here are just some examples:

AUTOMATED ASSESSMENTS

With over 200 assessments, covering the entire course, you can set plenty of work every week as you teach the syllabus.

FLIPPED LEARNING

Use EzyMaths to support flipped classrooms and blended learning. Know for sure whether or not students have completed their preparations.

MONITORING & INTERVENTION

Use our comprehensive reports to monitor student completion and identify problem areas to focus on in class.

PARENTS' EVENINGS

Print off our automated reports and hand them out at Parents' Evenings. Easy to evidence student effort and attainment levels.

REVISION TOOL

EzyMaths is the ideal revision tool. When exams approach, students have 24/7 access to resources covering every single topic in depth.
